Florida International University • Expected Fall 2024 • Relevant Coursework: Data Structures, Discrete Structures, Database Management, Systems Programming

SKILLS

Technical Skills: HTML, CSS, Javascript, Node JS, Java, React JS, Python, Visual Studio Code, Agile

Languages: English (native), Spanish (Fluent)

EXPERIENCE

Software Engineer Spring Intern

Miami Dade County IT Department

May 2024 – May 2024, Miami, FL

- Utilized web development tools such as CSS, HTML, JavaScript, and React JS to create a website dedicated to the Miami Dade County's internal network for developers.
- Collaborated with my team members utilizing SCRUM and Agile practices in order to successfully create our project within 3 weeks.
- Learned how to use IIS servers and Azure DevOps Repos and Pipelines in order to successfully deploy the website.

PROJECTS/OPEN SOURCE

Portfolio Website Open Source Project (alexnarvaeze.com)

- Completed and finalized development of my personal portfolio website in which I have on display my past projects.
- Created using HTML, CSS, and JavaScript.

Capital Literacy Shell Hacks 2024

- Created a financial literacy app based around Capital One's design meant to inform and educate minority communities on financial based decisions including investing in the US Stock Market and budgeting tips / tools.
- Utilized React JS, Material UI, HTML, CSS, JavaScript, and mySQLlite to create a functioning mobile web app that includes a ChatGPT API which was designed to emulate a Capital One AI assistant.

Finn Statefarm Shell Hacks 2023

- Front and back-end development on my team's mobile web application, in which we integrated 2 API's, the ChatGPT API and a Vehicle Identification Number searcher API.
- Won 3rd place in the challenge.

INVOLVEMENT

Florida International University

- Break Through Tech Miami, completed Sprinternship program and weekly React seminars
- INIT formerly UPE, won Shell Hacks 2023 (Won State Farm Challenge), general meetings and web development workshops
